

Session 2. Quality Improvement

Quality Improvement of Pediatric Anesthesia in India

Learning Objectives:

The practical problems faced in India to ensure quality of care for providing safe anesthesia across our vast nation.

This will include:

1. Initiatives by the government of India, medical societies, individual hospitals, and nongovernment organizations towards ensuring equitable, and safe health for all.
2. Training medical personnel and healthcare workers
3. Accreditation of healthcare facilities, guidelines, and checklists,

This lecture will discuss the measures that have been taken on the ground level, the systems that have been established and the challenges involved in ensuring implementation of the same in India.
